THE subjoined Table exhibits the number of Graduates at each Commencement since the establishment of the Institution, and the number of Matriculates during each year since the organization of the Faculty by the appointment of the late Dr. CALDWELL as President, 11th July, 1804.

The first printed Catalogue of Students appeared in 1819. Since that time the number of Matriculates has in every instance been greater than that stated in the Table. Our Catalogues are always published at an early period of the collegiate year, and exhibit the names of those only who have been present and pursuing their studies with some one of the classes during that year. The whole number of Matriculates, for instance, in 1837 was 150, in 1836 176, in 1839 173, in 1840 184, and in 1841 174.

SYSTEM OF STUDIES.
PREPARATORY TO ADMISSION
INTO THE
UNIVERSITY.

APPLICANTS for admission into the Freshman Class, are required to sustain an approved examination on the Grammars of the English, Latin and Greek Languages, including Latin Prosody; Mair's Introduction, or Andrews' Exercises; Cæsar's Commentaries (five books); Ovid's Metamorphoses (Gould's Edition—extracts from the first six books); Virgil's Bucolics and six Books of the Æneid; Sallust; Greek Testament (St. John's Gospel and Acts of the Apostles); Græca Minora, or Greek Reader; Arithmetic; Ancient and Modern Geography.

The importance of a full and faithful compliance with these requisitions, cannot be too highly estimated by Parents and Guardians. If they desire that their sons and wards shall attain sound scholarship, they must look well to the foundation on which the superstructure is to be reared.

Of the preparatory studies, the branches on which Candidates for admission into College are frequently found either wholly deficient, or imperfectly prepared, are Arithmetic, Ancient Geography, Prosody, and Latin Exercises.

Emerson's Arithmetic (third part), Worcester's Geography and Atlas, Andrews and Stoddard's Latin Grammar, and Bullion's Greek Grammar, are recommended to Instructors who are preparing Students for the University.

The Collegiate year is divided into two Sessions or terms, the one commencing six weeks after the first Thursday in June, the other six weeks after the fourth Friday in November.

Composition and Declamation receive due attention throughout the whole course. The three lower classes are required to declaim in private before the Professor of Rhetoric, and afterwards in the presence of the Faculty.

The Senior Class deliver Oration of their own composition upon the public stage twice in each session.

All the Classes are required to attend Divine Worship in the College Chapel on Sunday forenoon, and in the afternoon to recite on the Historical parts of the Old and New Testaments.

The instruction of the Freshman Class, is confided, for the most part, to the Tutor of Ancient Languages, and the Tutor of Mathematics.

By the division of the Department of Ancient Languages into two branches, with a Professor to each, and by the appointment of a Professor of Rhetoric, very ample means of instruction are afforded in these studies, while the other Professors are enabled to give increased attention to their more peculiar duties.

In addition to National and Constitutional Law, the President gives instruction in Mental and Moral Philosophy, and in Political Economy.

A regular course of Lectures on Chemistry, Mineralogy and Geology, illustrated by experiments, and the exhibition of specimens, is delivered to the Senior Class, by the Professor of Chemistry, who also gives occasional Lectures on the other departments of Natural History.

To the means of instruction and improvement heretofore enjoyed in this department, was added, during the last year, a Cabinet of Minerals purchased for the University in Vienna, by the Secretary of the Legation of the United States, near the Court of Austria.

The recitations and Lectures of the Professor of Mathematics and Natural Philosophy are illustrated by experiments with an Apparatus selected by the late Dr. CALDWELL, during a visit made by him to Europe, some years since, for that purpose.

The College buildings have undergone thorough repair. Extensive improvements are now in progress; and others are in contemplation. Increased efficacy has been imparted to the system of Instruction: more attention is paid to neatness and comfort in the various apartments of the Institution; and energetic measures have been adopted for confining the expenses of Education within reasonable limits.

Reports of the deportment and scholarship of the Students are sent Parents and Guardians, at the middle and close of each Session.

ANNUAL EXPENSES.

Tuition,	\$50	\$50
Room Rent,	2	2
Servant hire,	5	5
Deposit,	4	4
Board for 40 weeks, at \$8 to \$11, per month,	74	to 102
Bed and Washing,	16	to 22
Wood,	5	5
Candles,	5	5
Total from						161	to 195

Board of a quality not inferior to what is furnished at the Tables of the most respectable Boarding Houses of the neighboring villages, may be had at the Steward's Hall and elsewhere at \$8 per month. In addition to the above expenses, there are those incurred for books, pocket-money, and certain others incident to a connexion with the Literary Societies, the amount of which is fixed by the private regulations of those bodies.

The whole series of books, for the four years, may be purchased for \$60 or \$70. It is desirable that every Student shall retain his Text Books, and take them with him when he leaves College ; but as in most instances, they are parted with to the succeeding classes, at a reduced price, this item of expense is thereby rendered less burthensome to many.

Every Student is required on his arrival at the commencement of each Session, to deliver to the Bursar (Professor Mitchell) the moneys and drafts for money, which he has brought with him.

It is the duty of the Bursar to attend to the settlement of the demands for board, &c.—to pay into the hands of the Student such sums as are required for other necessary expenses, and to render a statement of the same to the Parent or Guardian at the close of the Session.

The Merchants in this place have entered into an engagement, that the system of unlimited credits, heretofore in use, shall be abandoned ; and that they will confine themselves in this particular, to those cases in which the Parent or Guardian has previously given a specific and definite sanction, and thus rendered the transaction his own. From the foregoing statements, it will be seen what amount of money a young man is likely to require. With the safeguards, therefore, that have been provided, there is every reasonable security, if the regulations of the Trustees are complied with, that there will be no disappointment in regard to the expense of an Education at the University.

The Faculty concur in the opinion expressed upon this subject by the *Executive Committee*, in their Circular Address to Parents and Guardians on the 15th April, 1837, that exclusive of the supplies of clothing ordinarily obtained from home, more than two hundred and fifty dollars per annum is not necessary, to either the comfort or convenience of any young man while at this Institution.

The Faculty are authorized in all cases, where the applicant is a native of the State, sustains a fair moral character, is believed to possess good talents and studious habits, and is unable to defray the expense of tuition and room rent, to admit him free of charge, into any class for which he may be prepared.

THE ANNUAL COMMENCEMENT

Is on the first Thursday in June. Candidates for admission are examined eight days previous.

THE PHILANTHROPIC AND DIALECTIC SOCIETIES select, alternately, one of their members to deliver an Address before the two bodies, on the forenoon of the day preceding the Commencement.
